The current situation on the cryptocurrency market

The year 2021 marked a new wave of interest in cryptocurrency. The disruption of logistical systems and the complication of ways to conduct fiat financial transactions led to a systematic transition of part of the economy to the cryptocurrency sector.

Also, the infrastructure and tools for trading and managing cryptocurrencies began to develop, making them more accessible to ordinary people.

Global Economics Problems

The world economic system has been transforming since the 20th century. In the 21st century we are witnessing a new way. The systematic actions of regulators aimed at the total control of the people's finances are taking on an extremely destructive scale.

PROBLEMS OF THE TRADITIONAL FINANCIAL SYSTEM

- High inflation
- Departure from "private money".
- The worldwide introduction of CBDCs

Solution

Cryptocurrencies, the decentralized financial instruments, were conceived as a safe and anonymous way of storing funds and paying off each other.

The idea of decentralization is the main value of the Maxpread Technologies ecosystem. The company's financial tools aim to return to the values of "private money", safe and anonymous earning, saving and multiplying capital.

Maxpread Technologies Ecosystem

The Maxpread Technologies ecosystem is a complementary product aimed at providing users with secure, anonymous financial and digital tools.

The Maxpread Technologies ecosystem is based on the principles of decentralization, anonymity and security. All company products are focused on safe storage, multiplication and use of assets by the user.

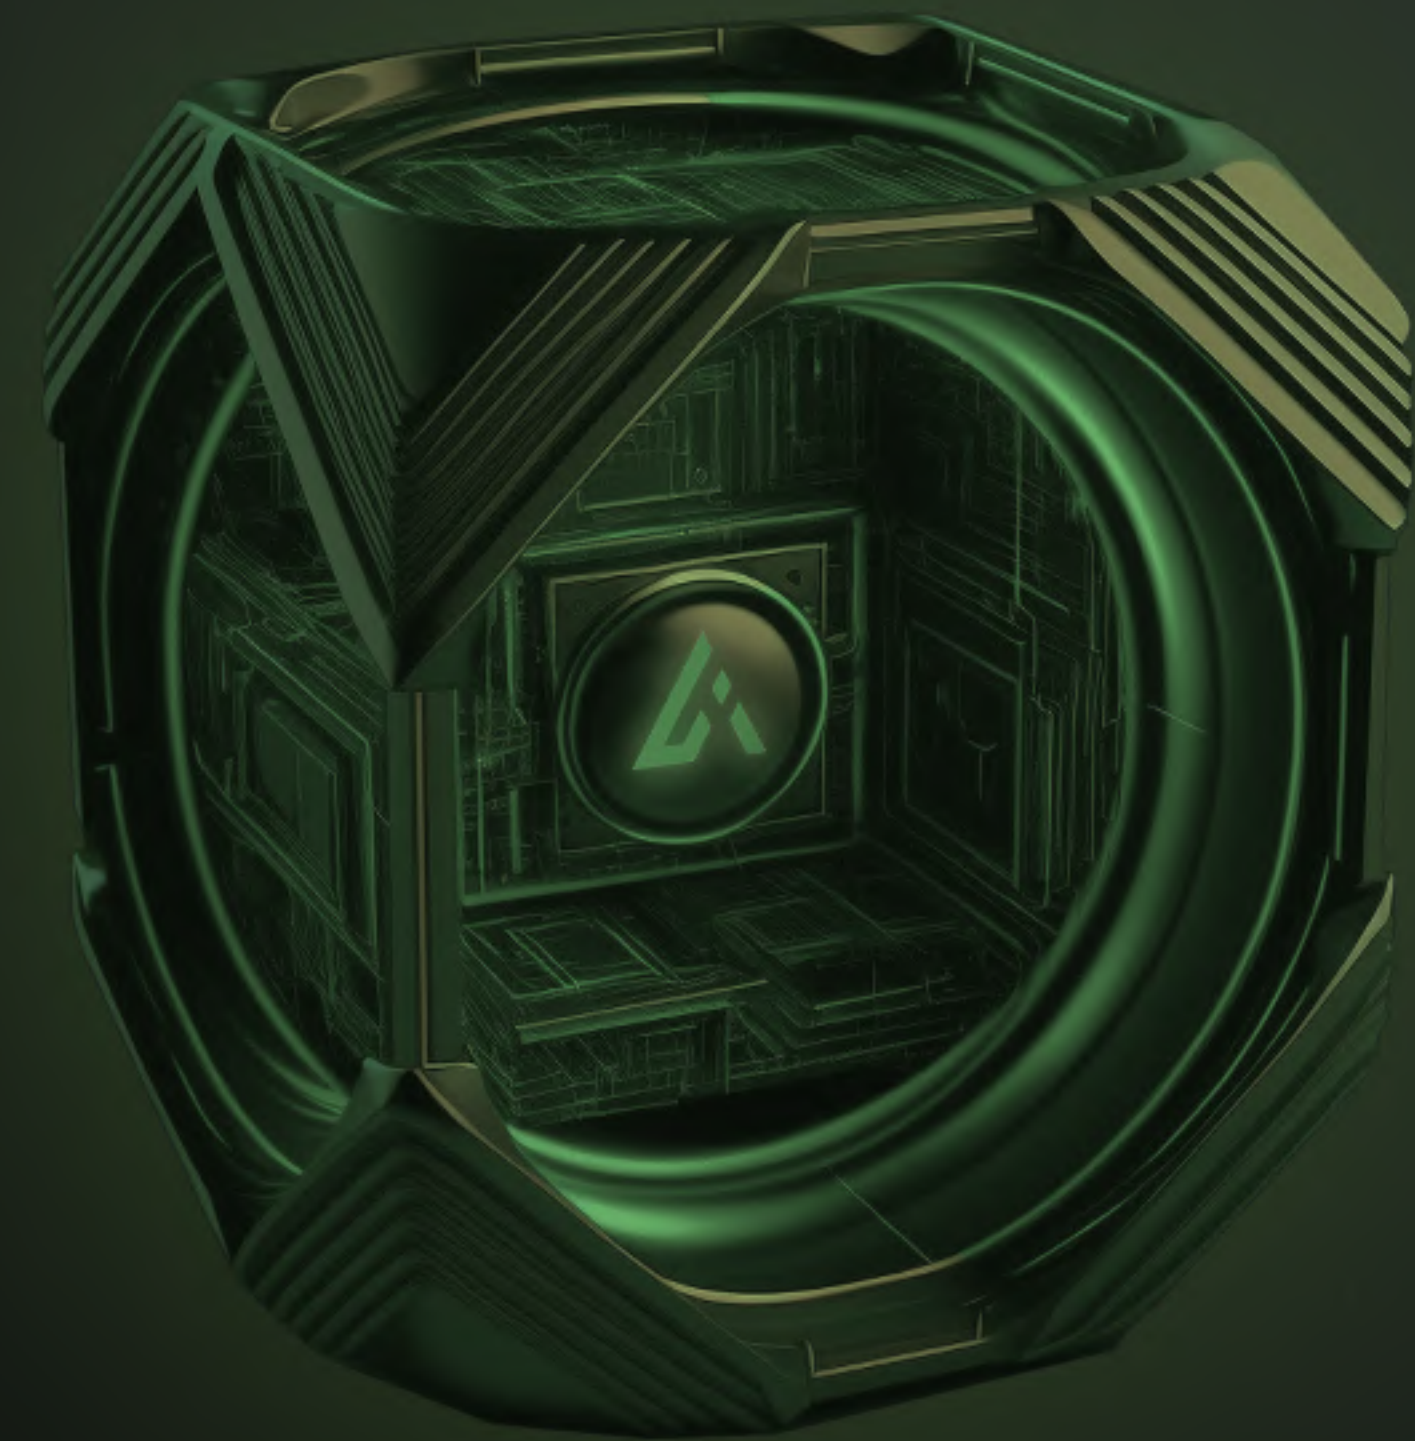

AGORA

AGORA is a partner company that provides Maxpread Technologies with unique and innovative developments in the fields of artificial intelligence, cloud computing and high-precision automated interbank trading.

Affiliate Program

Any user of Maxpread Technologies platform, who paid for the arbitration plan, can get the affiliate program reward for the promotion of the company's products.

There are seven types of bonuses within the Affiliate program

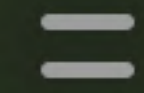

DIRECT BONUS

BINARY BONUS

LEADERSHIP BONUS

MATCHING BONUS

MARKETING BONUS

FAST START BONUS

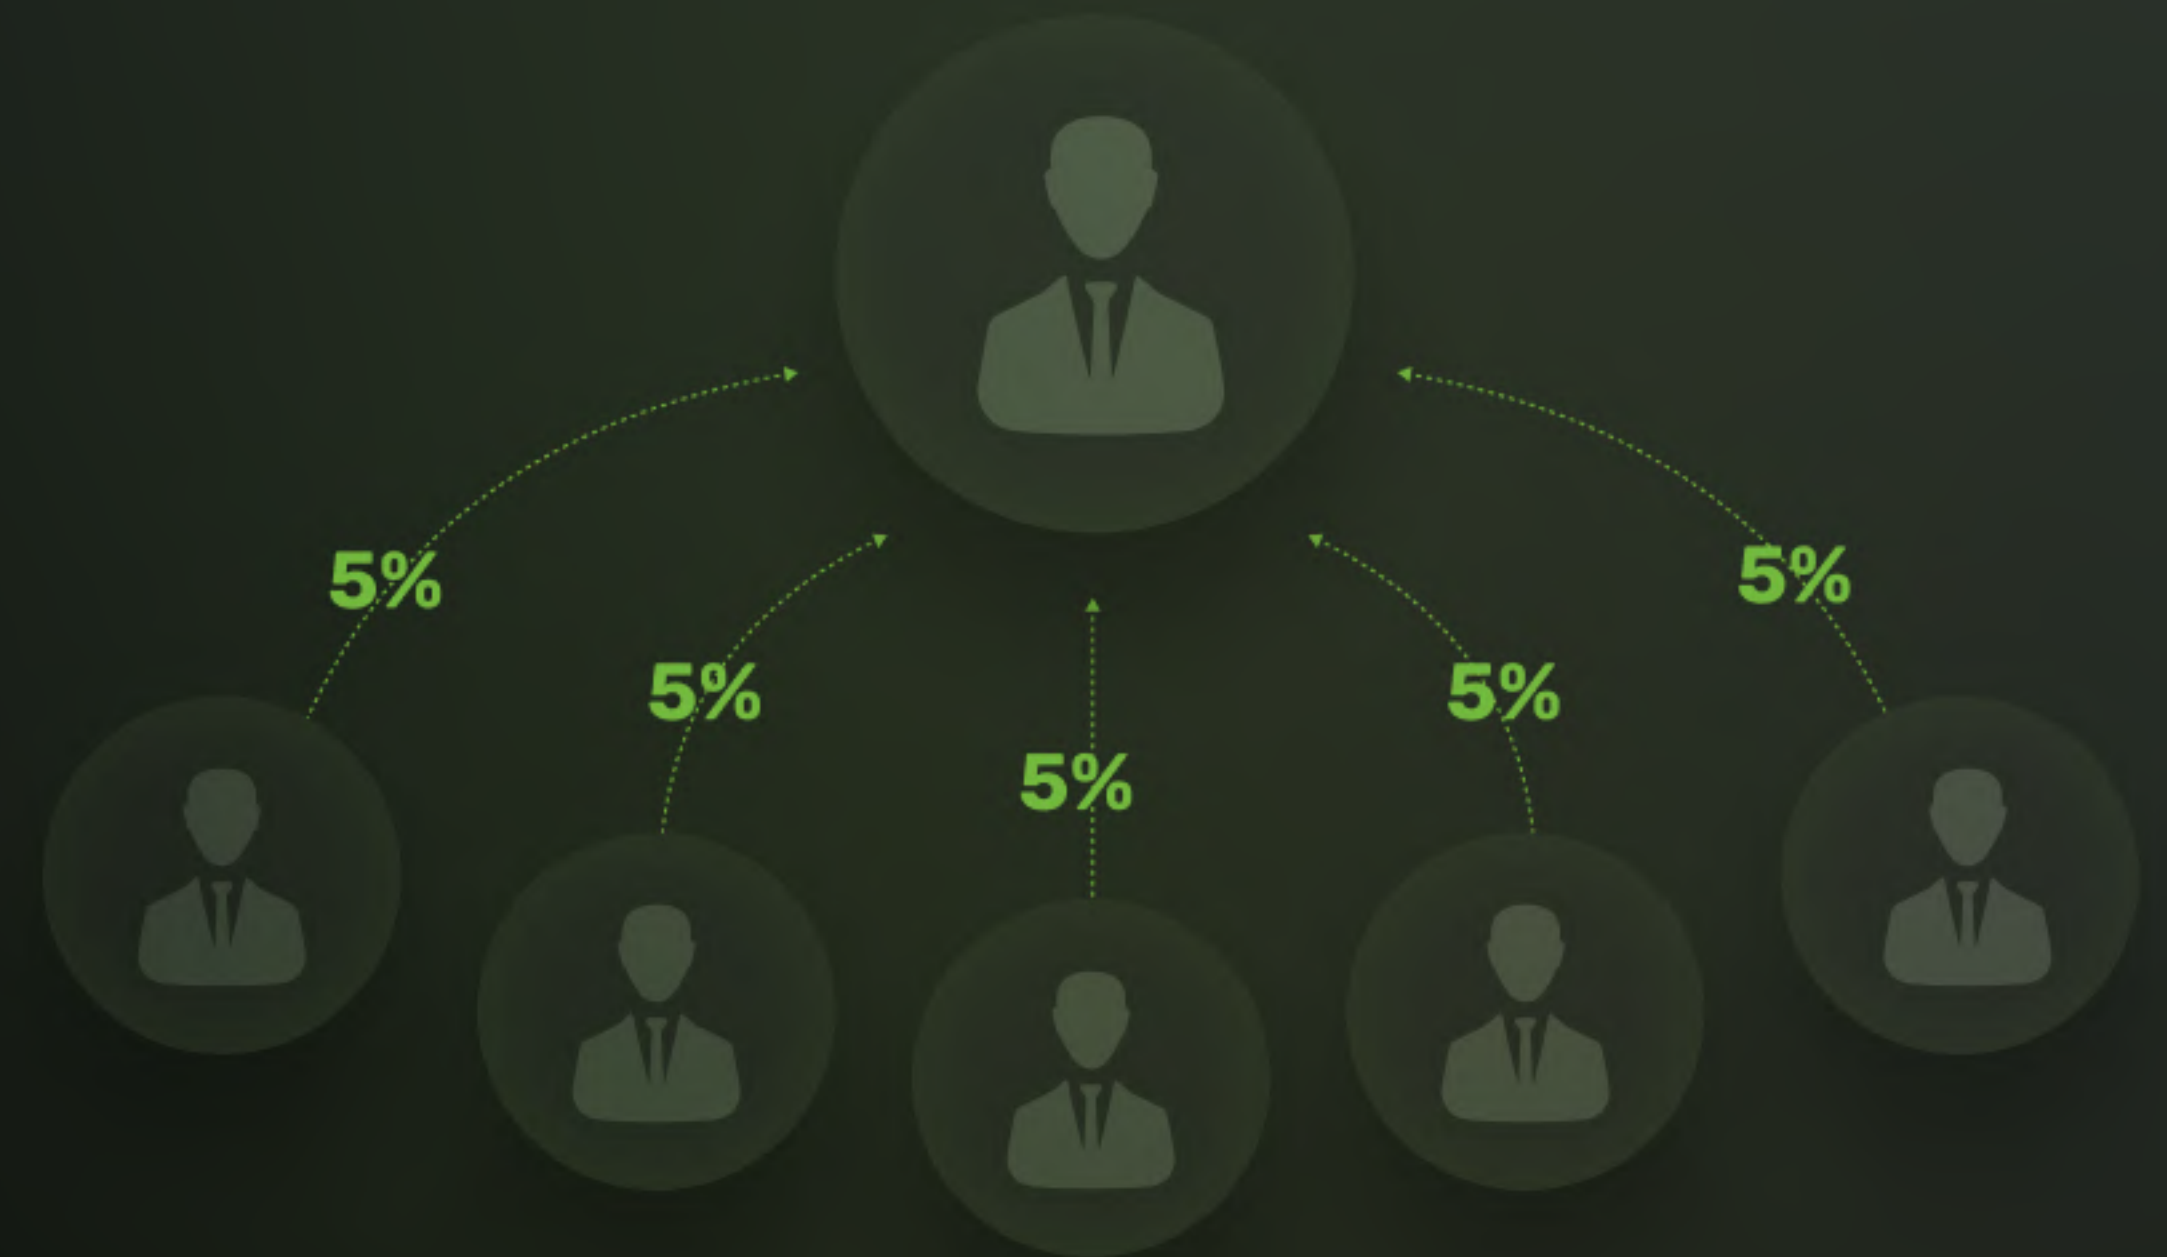

INFINITY BONUS

Direct Bonus

A Direct Bonus is a 5% reward on the value of a user's arbitration plan, who was invited using your referral link.

Direct bonus is paid at the moment of purchase or each plan upgrade by your affiliate.

Binary bonus

Binary bonus is a reward that is paid for a symmetrical construction of a binary structure. *

This type of structure formation implies the creation of two directions (left and right) of the team, observing a certain logic.

**-Maximum reward for the binary bonus is 400% of the value of the arbitrage plan of the platform user per week and is paid daily at 02:00 UTC. The payout limit is updated once every 7 days from the date of purchase of your first plan.*

Binary Bonus

Binary bonus is a reward that is paid for the symmetrical construction of a binary structure. *

To receive the maximum possible binary bonus, distribute the volumes in the ratio of 30% - sponsor direction and 70% - own direction.

In case the sponsor's direction has less than 30% of the partner's own group volume, the binary bonus is paid with a reduction factor proportional to the deviation from the reference direction ratio.
